## **Assumption of Risk, Indemnification, Hold Harmless, and Waiver of Liability Agreement**

Name: \_\_\_\_\_ Grade: \_\_\_\_\_

Player's E-mail: \_\_\_\_\_ Player's Cell #: \_\_\_\_\_

Parent/Guardian E-mail: \_\_\_\_\_ Parent/Guardian Cell #: \_\_\_\_\_

Alternate Contact E-mail: \_\_\_\_\_ Alternate Contact Cell #: \_\_\_\_\_

In consideration of me/my child's being permitted to attend and/or participate in the \_\_\_\_\_ (TEAM, TRYOUTS AND CLINIC), I do hereby agree to assume all risks and responsibilities relative thereto. I hereby represent to Arlington Community Schools Board of Education (ACS) that I/my child am/is capable of participating in the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC) and that I/my child is strongly encouraged to consult a physician prior to participation in the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC). I hereby recognize the risks of illness, including the risk of transmission of communicable diseases, such as COVID-19, and injuries inherent in participating in \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), and recognizing those risks, I agree to assume all risks, including but not limited to, financial risks, associated with my/my child's participation in the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC).

I hereby release, waive liability, discharge, hold harmless, and covenant not to sue \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), volunteers, \_\_\_\_\_ (SCHOOL/SPORT) Team and its Coaches, \_\_\_\_\_ (SCHOOL), and Arlington Community Schools Board of Education, their agents, representatives, Board Members, and Employees (hereinafter referred to as Releasees) from any kind of liability, claims, demands, and actions of any kind arising out of or related to any loss, damage, or injury, including death, that may be sustained by me/my child, whether caused by the negligence or gross negligence of the Releasees, or otherwise, while attending the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC). I further agree to indemnify \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), \_\_\_\_\_ (SCHOOL), Arlington Community Schools Board of Education, their agents, Board Members, representatives, and employees and hold them harmless from any claims, demands, causes of action or any other legal or equitable actions arising out of or related to my/my child's participation in and/or attendance at the \_\_\_\_\_

\_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), including but not limited to, costs and attorney's fees associated with any such action.

It is my express intent that this Assumption of Risk, Indemnification, Hold Harmless, and Waiver of Liability Agreement shall be binding upon myself, my heirs, assigns and personal representatives and shall be deemed as a release, waiver, discharge, hold harmless and covenant not to sue the above named Releasees. I hereby further agree that this Assumption of Risk, Indemnification, Hold Harmless and Waiver of Liability Agreement shall be construed in accordance with the laws of the State of Tennessee.

I understand and agree that neither \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), volunteers, \_\_\_\_\_ (SCHOOL/SPORT) Coaches, \_\_\_\_\_ (SCHOOL), and Arlington Community Schools Board of Education, their agents, representatives, Board Members, or Employees will be responsible for any costs associated with any injury I/my child may sustain during my/their time as a participant and/or attendee at the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), and I agree and understand that I am financially responsible for all expenses incurred as a result of any injuries incurred as a result of my/my child's participation in the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC).

I also understand that by signing this Agreement, I am fully aware of my financial obligations and will assume all responsibilities for all property damage caused by me/my child to property owned by \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), volunteers, \_\_\_\_\_ (SCHOOL/SPORT) Coaches, \_\_\_\_\_ (SCHOOL), or Arlington Community Schools Board of Education.

I agree and understand that as a condition precedent to my/my child's participation in the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC), I must present proof of current health insurance that will cover all costs and expenses related to any injuries suffered by me/my child as a result of my/my child's participation and/or attendance at the \_\_\_\_\_ (TEAM, TRYOUTS, AND CLINIC).

By signing this Agreement, I acknowledge and represent that I have read and understand the foregoing Agreement.

**Student Participant:** \_\_\_\_\_ **Date:** \_\_\_\_\_

# Sudden Cardiac Arrest

## Symptoms and Warning Signs

### What is Sudden Cardiac Arrest (SCA)?

SCA is a life-threatening emergency that occurs when the heart suddenly and unexpectedly stops beating. This causes blood and oxygen to stop flowing to the rest of the body. The individual will not have a pulse. It can happen without warning and can lead to death within minutes if the person does not receive immediate help. Only **1 in 10** survives SCA. If Cardiopulmonary Resuscitation (CPR) is given and an Automatic External Defibrillator (AED) is administered early, **5 in 10** could survive.

SCA is NOT a heart attack, which is caused by reduced or blocked blood flow to the heart. However, a heart attack can increase the risk for SCA.

### Watch for Warning Signs

SCA usually happens without warning. SCA can happen in young people who don't know they have a heart problem, and it may be the first sign of a heart problem. When there are warning signs, the person may experience:

If any of these warning signs are present, it's important to talk with a health care provider. There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops due to SCA, blood stops flowing to the brain and other body organs. Death or permanent brain damage can occur in minutes.

### Electrocardiogram (EKG) Testing

EKG is a noninvasive, quick, and painless test that looks at the heart's electrical activity. Small electrodes attached to the skin of the arms, legs, and chest capture the heartbeat as it moves through the heart. An EKG can detect some heart problems that may lead to an increased risk of SCA. Routine EKG testing is not currently recommended by national medical organizations, such as the American Academy of Pediatrics and the American College of Cardiology, unless the pre-participation physical exam reveals an indication for this test. The student or parent may request, from the student's health care provider, an EKG be administered in addition to the student's pre-participation physical exam, at a cost to be incurred by the student or the student's parent.

### Limitations of EKG Testing

- An EKG may be expensive and cannot detect all conditions that predispose an individual to SCA.

- False positives (abnormalities identified during EKG testing that turn out to have no medical significance) may lead to unnecessary stress, additional testing, and unnecessary restriction from athletic participation.
- Accurate EKG interpretation requires adequate training.

*I have reviewed and understand the symptoms and warning signs of SCA.*

## **Athlete/Parent/Guardian Sudden Cardiac Arrest Symptoms and Warning Signs Information Sheet and Acknowledgement of Receipt and Review Form**

### **What is sudden cardiac arrest?**

Sudden cardiac arrest (SCA) is when the heart stops beating, suddenly and unexpectedly. When this happens, blood stops flowing to the brain and other vital organs. SCA doesn't just happen to adults; it takes the lives of students, too. However, the causes of sudden cardiac arrest in students and adults can be different. A youth athlete's SCA will likely result from an inherited condition, while an adult's SCA may be caused by either inherited or lifestyle issues. SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

### **How common is sudden cardiac arrest in the United States?**

SCA is the #1 cause of death for adults in this country. There are about 300,000 cardiac arrests outside hospitals each year. About 2,000 patients under 25 die of SCA each year. It is the #1 cause of death for student athletes.

### **Are there warning signs?**

Although SCA happens unexpectedly, some people may have signs or symptoms, such as:

- fainting or seizures during exercise;
- unexplained shortness of breath;
- dizziness;
- extreme fatigue;
- chest pains; or
- racing heart.

These symptoms can be unclear in athletes, since people often confuse these warning signs with physical exhaustion. SCA can be prevented if the underlying causes can be diagnosed and treated.

### **What are the risks of practicing or playing after experiencing these symptoms?**

There are risks associated with continuing to practice or play after experiencing these symptoms. When the heart stops, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who experience SCA die from it.

### **Public Chapter 325 – the Sudden Cardiac Arrest Prevention Act**

The act is intended to keep youth athletes safe while practicing or playing. The requirements of the act are:

- All youth athletes and their parents or guardians must read and sign this form. It must be returned to the school before participation in any athletic activity. A new form must be signed and returned each school year.

- The immediate removal of any youth athlete who passes out or faints while participating in an athletic activity, or who exhibits any of the following symptoms:
  - (i) Unexplained shortness of breath;
  - (ii) Chest pains;
  - (iii) Dizziness
  - (iv) Racing heart rate; or
  - (v) Extreme fatigue; and
- Establish as policy that a youth athlete who has been removed from play shall not return to the practice or competition during which the youth athlete experienced symptoms consistent with sudden cardiac arrest
- Before returning to practice or play in an athletic activity, the athlete must be evaluated by a Tennessee licensed medical doctor or an osteopathic physician. Clearance to full or graduated return to practice or play must be in writing.

*I have reviewed and understand the symptoms and warning signs of SCA.*

# CONCUSSION

## INFORMATION AND SIGNATURE FORM FOR STUDENT-ATHLETES & PARENTS/LEGAL GUARDIANS

(Adapted from CDC “Heads Up Concussion in Youth Sports”)

Public Chapter 148, effective January 1, 2014, requires that school and community organizations sponsoring youth athletic activities establish guidelines to inform and educate coaches, youth athletes and other adults involved in youth athletics about the nature, risk and symptoms of concussion/head injury.

**Read and keep this page.**  
**Sign and return the signature page.**

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow or jolt to the head or body that causes the head and brain to move rapidly back and forth. Even a “ding,” “getting your bell rung” or what seems to be a mild bump or blow to the head can be serious.

### Did You Know?

- Most concussions occur *without* loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

### WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports **one or more** symptoms of concussion listed below after a bump, blow or jolt to the head or body, s/he should be kept out of play the day of the injury and until a health care provider\* says s/he is symptom-free and it’s OK to return to play.

SIGNS OBSERVED BY COACHING STAFF	SYMPTOMS REPORTED BY ATHLETES
Appears dazed or stunned	Headache or “pressure” in head
Is confused about assignment or position	Nausea or vomiting
Forgets an instruction	Balance problems or dizziness
Is unsure of game, score or opponent	Double or blurry vision
Moves clumsily	Sensitivity to light
Answers questions slowly	Sensitivity to noise
Loses consciousness, even briefly	Feeling sluggish, hazy, foggy or groggy
Shows mood, behavior or personality changes	Concentration or memory problems
Can’t recall events <i>prior</i> to hit or fall	Confusion
Can’t recall events <i>after</i> hit or fall	Just not “feeling right” or “feeling down”

\*Health care provider means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training

## CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention after a bump, blow or jolt to the head or body if s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that not only does not diminish, but gets worse
- Weakness, numbness or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless or agitated
- Has unusual behavior
- Loses consciousness (*even a brief loss of consciousness should be taken seriously*)

## WHY SHOULD AN ATHLETE REPORT HIS OR HER SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brains. *They can even be fatal.*

Remember:

Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

## WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care provider\* says s/he is symptom-free and it's OK to return to play.

Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration such as studying, working on the computer or playing video games may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.

\* Health care provider means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training.

## Student-athlete & Parent/Legal Guardian Concussion Statement

Must be **signed and returned** to school or community youth athletic activity prior to participation in practice or play.

Student-Athlete Name: \_\_\_\_\_

Parent/Legal Guardian Name(s): \_\_\_\_\_

After reading the information sheet, I am aware of the following information:

Student-Athlete initials		Parent/Legal Guardian initials
	A concussion is a brain injury which should be reported to my parents, my coach(es) or a medical professional if one is available.	
	A concussion cannot be "seen." Some symptoms might be present right away. Other symptoms can show up hours or days after an injury.	
	I will tell my parents, my coach and/or a medical professional about my injuries and illnesses.	N/A
	I will not return to play in a game or practice if a hit to my head or body causes any concussion-related symptoms.	N/A
	I will/my child will need written permission from a <i>health care provider*</i> to return to play or practice after a concussion.	
	Most concussions take days or weeks to get better. A more serious concussion can last for months or longer.	
	After a bump, blow or jolt to the head or body an athlete should receive immediate medical attention if there are any danger signs such as loss of consciousness, repeated vomiting or a headache that gets worse.	
	After a concussion, the brain needs time to heal. I understand that I am/my child is much more likely to have another concussion or more serious brain injury if return to play or practice occurs before the concussion symptoms go away.	
	Sometimes repeat concussion can cause serious and long-lasting problems and even death.	
	I have read the concussion symptoms on the Concussion Information Sheet.	

*\* Health care provider* means a Tennessee licensed medical doctor, osteopathic physician or a clinical neuropsychologist with concussion training

To student athletes and their parents/caregivers:

Before you can play a sport the TSSAA (Tennessee Secondary School Athletic Association) says you must get a sport's physical. This is also called a PPE (Preparticipation Physical Evaluation). The PPE promotes the health and well-being of athletes as they train and compete. It also helps keep athletes safe as they play sports. It is NOT meant to stop them from playing.

Where can you go to get a PPE? In the newest PPE guidebook, the groups below say your doctor's office or the place where you get your medical care is where you can go to get it done:

- the American Academy of Pediatrics,
- the American Academy of Family Physicians,
- the American College of Sports Medicine,
- the American Medical Society for Sports Medicine,
- the American Orthopedic Society for Sports Medicine,
- and the American Osteopathic Academy of Sports Medicine.
- It's also endorsed by the National Athletic Trainers' Association and the National Federation of State High School Associations.

There are other places you can get a PPE, but **we recommend athletes get a PPE during their Well Visit at their doctor's office or School Based Health Center.** This ensures exams cover everything important about your overall health and well-being. It also limits absences from school and sports.

We encourage you to work the PPE into the routine health care you get at your doctor's office or the place where you get your medical care. If you're enrolled in TennCare your well visits are free.

Sincerely,

Tennessee Secondary School Athletic Association  
Tennessee Chapter of the American Academy of Pediatrics  
Tennessee Division of TennCare

Do you have TennCare and need to know who your doctor is? You can call your MCO at:

Amerigroup: 1-800-600-4441

BlueCare: 1-800-468-9698

UnitedHealthcare: 1-800-690-1606

TennCareSelect: 1-800-263-5479

This form should be placed into the athlete's medical file and should **not** be shared with schools or sports organizations. The Medical Eligibility Form is the only form that should be submitted to a school or sports organization.

Disclaimer: Athletes who have a current Preparticipation Physical Evaluation (per state and local guidance) on file should not need to complete another examination.

## ■ PREPARTICIPATION PHYSICAL EVALUATION (Interim Guidance)

### PHYSICAL EXAMINATION FORM

#### PHYSICIAN REMINDERS

- Consider additional questions on more-sensitive issues.
  - Do you feel stressed out or under a lot of pressure?
  - Do you ever feel sad, hopeless, depressed, or anxious?
  - Do you feel safe at your home or residence?
  - Have you ever tried cigarettes, e-cigarettes, chewing tobacco, snuff, or dip?
  - During the past 30 days, did you use chewing tobacco, snuff, or dip?
  - Do you drink alcohol or use any other drugs?
  - Have you ever taken anabolic steroids or used any other performance-enhancing supplement?
  - Have you ever taken any supplements to help you gain or lose weight or improve your performance?
  - Do you wear a seat belt, use a helmet, and use condoms?
- Consider reviewing questions on cardiovascular symptoms (Q4–Q13 of History Form).

## ■ PREPARTICIPATION PHYSICAL EVALUATION

### MEDICAL ELIGIBILITY FORM

Name: \_\_\_\_\_ Date of birth: \_\_\_\_\_

- Medically eligible for all sports without restriction
- Medically eligible for all sports without restriction with recommendations for further evaluation or treatment of

\_\_\_\_\_

\_\_\_\_\_

- Medically eligible for certain sports

\_\_\_\_\_

\_\_\_\_\_

- Not medically eligible pending further evaluation
- Not medically eligible for any sports

Recommendations: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

I have examined the student named on this form and completed the preparticipation physical evaluation. The athlete does not have apparent clinical contraindications to practice and can participate in the sport(s) as outlined on this form. A copy of the physical examination findings are on record in my office and can be made available to the school at the request of the parents. If conditions arise after the athlete has been cleared for participation, the physician may rescind the medical eligibility until the problem is resolved and the potential consequences are completely explained to the athlete (and parents or guardians).

Este formulario debe colocarse en el expediente médico del atleta y no debe compartirse con escuelas u organizaciones deportivas. El formulario de elegibilidad médica es el único formulario que debe enviarse a una escuela u organización deportiva.

Aviso legal: Los atletas que tengan una evaluación física de preparticipación vigente en el archivo (según los lineamientos generales estatales y locales) no necesitan completar otro formulario de antecedentes.

## ■ EVALUACIÓN FÍSICA PREVIA A LA PARTICIPACIÓN (orientación provisional)

### FORMULARIO DE HISTORIAL CLÍNICO

Nota: Complete y firme este formulario (con la supervisión de sus padres si es menor de 18 años) antes de acudir a su cita.

Nombre: \_\_\_\_\_ Fecha de nacimiento: \_\_\_\_\_

Fecha del examen médico: \_\_\_\_\_ Deporte(s): \_\_\_\_\_

Sexo que se le asignó al nacer (F, M o intersexual): \_\_\_\_\_ ¿Con cuál género se identifica? (F, M u otro): \_\_\_\_\_

¿Ha tenido COVID-19? (elija una opción)  Sí  No

¿Ha recibido la vacuna contra el COVID-19? (elija una opción):  Sí  No Si la respuesta es sí, usted recibió:  Una dosis  Dos dosis

Mencione los padecimientos médicos pasados y actuales que haya tenido. \_\_\_\_\_

¿Alguna vez se le practicó una cirugía? Si la respuesta es afirmativa, haga una lista de todas sus cirugías previas. \_\_\_\_\_

Medicamentos y suplementos: Enumere todos los medicamentos recetados, medicamentos de venta libre y suplementos (herbolarios y nutricionales) que consume. \_\_\_\_\_

¿Sufre de algún tipo de alergia? Si la respuesta es afirmativa, haga una lista de todas sus alergias (por ejemplo, a algún medicamento, al polen, a los alimentos, a las picaduras de insectos). \_\_\_\_\_

Cuestionario sobre la salud del paciente versión 4 (PHQ-4)

Durante las últimas dos semanas, ¿con qué frecuencia experimentó alguno de los siguientes problemas de salud? (Encierre en un círculo la respuesta)

	Ningún día	Varios días	Más de la mitad de los días	Casi todos los días
Se siente nervioso, ansioso o inquieto	0	1	2	3
No es capaz de detener o controlar la preocupación	0	1	2	3
Siente poco interés o satisfacción por hacer cosas	0	1	2	3
Se siente triste, deprimido o desesperado	0	1	2	3

(Una suma  $\geq 3$  se considera positiva en cualquiera de las subescalas, [preguntas 1 y 2 o preguntas 3 y 4] a fin de obtener un diagnóstico).

PREGUNTAS GENERALES		
(Dé una explicación para las preguntas en las que contestó "Sí", en la parte final de este formulario. Encierre en un círculo las preguntas si no sabe la respuesta).		
	Sí	No
1. ¿Tiene alguna preocupación que le gustaría discutir con su proveedor de servicios médicos?		
2. ¿Alguna vez un proveedor de servicios médicos le prohibió o restringió practicar deportes por algún motivo?		
3. ¿Padece algún problema médico o enfermedad reciente?		
PREGUNTAS SOBRE SU SALUD CARDIOVASCULAR		
	Sí	No
4. ¿Alguna vez se desmayó o estuvo a punto de desmayarse mientras hacía, o después de hacer, ejercicio?		

PREGUNTAS SOBRE SU SALUD CARDIOVASCULAR (CONTINUACIÓN)		
	Sí	No
5. ¿Alguna vez sintió molestias, dolor, compresión o presión en el pecho mientras hacía ejercicio?		
6. ¿Alguna vez sintió que su corazón se aceleraba, palpitaba en su pecho o latía intermitentemente (con latidos irregulares) mientras hacía ejercicio?		
7. ¿Alguna vez un médico le dijo que tiene problemas cardíacos?		
8. ¿Alguna vez un médico le pidió que se hiciera un examen del corazón? Por ejemplo, electrocardiografía (ECG) o ecocardiografía.		
9. Cuando hace ejercicio, ¿se siente mareado o siente que le falta el aire más que a sus amigos?		
10. ¿Alguna vez tuvo convulsiones?		

PREGUNTAS SOBRE LA SALUD CARDIOVASCULAR DE SU FAMILIA		Sí	No
11.	¿Algún de los miembros de su familia o pariente murió debido a problemas cardíacos o tuvo una muerte súbita e inesperada o inexplicable antes de los 35 años de edad (incluyendo muerte por ahogamiento o un accidente automovilístico inexplicable)?		
12.	¿Algún de los miembros de su familia padece un problema cardíaco genético como la miocardiopatía hipertrófica (HCM), el síndrome de Marfan, la miocardiopatía arritmogénica del ventrículo derecho (ARVC), el síndrome del QT largo (LQTS), el síndrome del QT corto (SQTS), el síndrome de Brugada o la taquicardia ventricular polimórfica catecolaminérgica (CPVT)?		
13.	¿Algún de los miembros de su familia utilizó un marcapasos o se le implantó un desfibrilador antes de los 35 años?		
PREGUNTAS SOBRE LOS HUESOS Y LAS ARTICULACIONES		Sí	No

Arlington Community Schools has selected the Student Insurance Plan from **K&K Insurance Group** to make insurance coverage available to parents. ***This plan is strongly recommended.*** Even if you have other insurance coverage, this plan can help fill expensive “gaps” caused by deductibles and co-pays. Parents are responsible for full payment of the plan. ACS does **not** provide any of the coverage. Coverage may be purchased at any time during the school year by visiting [www.studentinsurance-kk.com](http://www.studentinsurance-kk.com).
